

# A Promising Support to Your Patients and Practice

**The Hana Hou Medical Group (HHMG) aims to assist not only our contracted physicians but also the patients that they serve.**

Our Care Management Team offers a comprehensive suite of services designed to assist patients and their support systems in managing chronic and complex conditions more effectively and efficiently. We use a team-based, patient-centered approach in delivering appropriate interventions for individuals within a given community to reduce health risks and decrease the total cost of care.

HHMG Care Management's current programs include Transition of Care and Complex Care Management. It encompasses care coordination activities to support primary care providers manage chronic illnesses and reduce hospital visits. We assist in the coordination and delivery of health care needed by their patients and their families. Through our care management programs, we strive to improve disease control and self-management, reduce burden, percent admissions and readmissions, and improve coordination of care for complex patients. Overall, we try to promote patient engagement so that they can take control of their health and well-being.

At no extra monetary cost to provider and patient, the Hana Hou Medical Group Care Team is dedicated in working closely with you and your providers in creating a care plan individually tailored to you and your health care needs. If you think this program will be of benefit to you, then you may ask your PCP to refer you to the Hana Hou Medical Group Care Management Team. Our referral forms are readily available on our website [www.hanahoumedicalgroup.com](http://www.hanahoumedicalgroup.com).

If you are interested to learn more about HHMG's Care Management Program, you are more than welcome to call us at (808) 646-7500 or email at [info@hanahoumedicalgroup.com](mailto:info@hanahoumedicalgroup.com).
